

Go Ahead

Take it for a Test Drive

You've had your eye on it...  
now you can kick the tires and see how it operates.

Give Streamware one route...we'll show you how our advanced technology will drive your operation's profitability. You can test one of the following options:

DEX CASH AUDIT • PRODUCT MERCHANDISING • ROUTE EFFICIENCIES

VendMAX/DeliveryMAX will help you increase cash flow, boost revenues, and cut costs. The results? A business that is more efficient, productive, competitive, and profitable.

And now with Test Drive, nothing's stopping you from driving home this best-in-class vending software solution.

**CRANE** streamware

A Crane Co. Company

“The Test Drive proved to me that the Streamware vending model works. By pre-kitting the route my driver simply drove up to each account and brought in the required inventory—just one visit instead of two. The time savings was incredible and that translates into dollar savings. I was sold on the productivity and profitability benefits and we’re now installing VendMAX across our 100 routes.”

— Paul Tims, Imperial Vending

# A Test Drive For Every Taste and Style

## Test Drive Basics

Streamware has made participating in Test Drive as easy as possible. There's no software to install—we host VendMAX on our own server. Our Test Drive project team provides on-site training, ongoing support, and in-depth analysis to you and your managers.

To get started, here's all you need to do:

- Select one DEX-ready route to try out VendMAX
- Choose one of the three Test Drive options

Streamware guarantees mutually agreed-upon results. If those results are met at the end of the Test Drive period, we hope you see the value of installing VendMAX throughout your organization. However, even if you're satisfied, **there is no obligation to install our solution.** You pay only for Streamware's expenses for the trial, as noted below.

## Three Test Drive Options

DEX CASH AUDIT | 6-Week Test Drive | \$4,000

Our DEX Cash Audit ensures full cash accountability by taking the route driver out of the equation. With VendMAX software and the Streamware handheld we'll track your route's cash shrinkage down to the nickel. If you think “meter-to-money” tracking is accurate enough, we'll show you a better way.

*Results Tested: All machines consistently DEX'd*

PRODUCT MERCHANDISING | 10-Week Test Drive | \$5,000

Increase your snack and soda sales on one route with VendMAX's full suite of analysis tools. We'll refine your item-level planograms, analyze the data, and make sure the right products are placed in the right machines at the right time.

*Results Tested: % sales increase by machine (snack and soda machines only)*

ROUTE EFFICIENCIES | 12-Week Test Drive | \$6,000

Give us three months and we'll improve one route's efficiency using all the tools at our disposal. From tracking product at the item-level to optimizing service schedules and pre-kitting the route to cut driver's time, you'll enjoy productivity and profitability improvements.

*Results Tested: \$ increase in Gross Profit/Minute*
